

Ensuring safety under environmental conditions of the mining and metallurgical industry

Section 8

Dr. rer. oec. Dipl.-Ing. Reinhardt Lorenz

Areas of Work

- Safety, reliability, sustainability, risks of technical measures to mitigate negative environmental influences
- Mobilization processes (drift, weathering, infiltration, leaching)
- Historical impact analyses and technology consequences
- Ecology of mining sites
- Ecological impact of mining and metallurgical processes

Klärungs- und Abwägungsprozesse für eine ökologisch-ökonomisch effiziente Altlastensanierung auf metallurgischen Altstandorten
